

Report to the Real Estate Commission

Suggestions, Recommendations & Update

1. The Post Education Workgroup recommends that the Real Estate Commission approve a change in NRS 645.575 3(a) be amended to complete the Post Licensing requirement within 6 months after initial licensing of a person. We believe that time of the essence and would like this change presented to the legislature in the upcoming session.

2. That the Division review the present Post Licensing program consisting of:
 - a. A review of the time allocated to each subject matter being taught in the program.
 - b. That the content of each module to be reviewed and upgraded if needed.
 - c. To consider suggesting reordering the presentation of the modules in line with the progression of the needs of the licensee.

Update:

A meeting of all CE Auditors was held and suggestions were made on how to update the process. The Division heard some of the concerns the auditors had with the evaluations and process. I am happy to report that Real Estate Division has made major upgrades to the CE Auditing Program. New Audit Evaluations have been put in place for Distance Education and Live

Classroom Presentation. These new evaluations are now on line to help speed up the process. In addition, the division will look into expanding the program to include the auditing of Post classes. We believe this will help insure the quality of the Post program and give valuable feed back to the Division.
